

BILZ ANTI VIBRATION TECHNOLOGY

*We are Pioneers to introduce **Anti Vibration Mounts** as a concept in India as an alternative solution to Civil foundation, Since 1995*

Bilz Anti Vibration Mounts are perfect solution for avoiding vibration transmission from machine to floor and vice versa.

For Machining Center we recommend

1) Bilz Insulating Plate

- B 0
- B 6

2) Precision Wedge Mount, PKA Series.

- ◆ PKA Series provides leveling accuracy upto ± 10 microns.
- ◆ PKA Series are provided with Insulating Plates.
- ◆ Insulating Plates selection will be depend on Machine Weight, Foot size and Speed.
- ◆ PKA Series will reduce vibration upto 60% to 70%

3) Leveling Element, BNSH Series

- ◆ BNSH series provides leveling accuracy upto ± 50 microns.
- ◆ BNSH Series are also provided with Insulating Plates.
- ◆ BNSH series are mostly Suitable for Small Size Machining center.

Successful Installation of

- * BFW
- * HASS
- * DMG
- * MAKINO
- * MAZAK
- * AMS
- * LIBHERRE
- * JYOTI
- * MAC POWER

Special Height Mount For TPM
